# Sketch for Proposed Problem

1) This is the home page or home screen of Instagram. Here the user can interact with the feed and see the stories of different users. Also one can navigate to the Instagram Reels vedeos from the bottom.

2) This is the landing page of instagram reels vedeos. By default the vedeo plays in muted version. Along with the video one can see the account details of the poster of video, details and captions and can like, comment & share.

3) To see the Reels video immersively on the full screen, one can single tap to the screen to unmute & hide the contents which were present on the screen. ie single tap to change profiles. between mute & unmute or hide/unhide.
